

RNME – REDE NACIONAL DE MICROSCOPIA ELECTRÓNICA
NATIONAL ELECTRON MICROSCOPY NETWORK

RNME – Pole of the University of Trás-os-Montes e Alto Douro

Unidade de Microscopia Electrónica

ACTIVITY REPORT
2010

1. Global characterization of the Pole activity and progress.

In the period under consideration **58 users (and 874 visits)** required services of the UME at UTAD, divided by:

- i) Training activities / Courses / Classes;
- ii) Teachers / Researchers (PhD);
- iii) Researchers (PhD under research grant contract);
- iv) PhD Students;
- v) MSc Students;
- vi) BSc/License Students;
- vii) Public and private companies;
- viii) Maintenance.

2. Resources and operation conditions.

2.1. Material resources.

- Scanning electron microscope (SEM FEI Quanta 400), with environmental SEM / E-SEM and chemical analysis by EDS (EDAX), resolution of 4 nm.
- Transmission electron microscope (Leo 906 TEM 120 kV), resolution of 0.33 nm; conventional photographic acquisition system;
- Carbon deposition and gold sputtering (Polaron);
- Ultramicrotome (RMC Power Tome XL);
- Optical microscope and Magnifying glass (MOTIC) for sample preparation

2.2. Human resources supporting the experimental facilities operation.

According to UTAD regulations, the management of equipment and human resources (UME Technician) is made under the Foundation Rei D. Dinis / UTAD. The supervision of UME is made by two Senior Investigators of UTAD. A technical commission of five investigators is responsible for formation, sample preparation, consulting, maintenance and guide-visits.

Scientific and technical resources

Name	Degree	Contract Category	Function in the RNME	RNME (h/week)
Ana Maria Nazaré Pereira	PhD	Full Professor	UME supervisor	2
Pedro Bandeira Tavares	PhD	Associate Professor	UME supervisor. SEM and TEM operator, formation, maintenance. Inorganic samples advisor.	12
Teresa Pinto	PhD	Auxiliary Professor	Biological samples preparation and advisor.	2
Paula Avelar Rodrigues	PhD	Auxiliary Professor	Ultramicrotome operator and formation Biological samples preparation and advisor.	2
Sandra Mariza Monteiro	PhD	Auxiliary Professor	Biological samples preparation and advisor.	2
Lisete Fernandes	Master Student	Technician	UME Technician. Sample preparation SEM and TEM operator. Maintenance.	36

2.3. Rules and access conditions to the electron microscopy experimental facilities.

The requested services are subject to schedule, taking into account the constraints imposed by the operator (Technician of UME), maintenance or other obligations for the proper functioning of the equipment. The agenda should be carried out during the week prior to the completion of the work. The work from Research Centers of UTAD has priority if the Technical Commission decides it. Biodegradable samples have also priority treatment.

Prices charged for services provided by UME are defined based on a table. This table and other relevant information are available at: <http://home.utad.pt/~ume>. The price for all RNME members is the same.

3. Training activities.

3.1 Training, information and demonstration activities addressed to researchers and to other users of the RNME.

The UME offers the possibility of teachers, technicians and researchers from UTAD become operators of SEM. A course with 3 steps must be accomplished:

- i) theoretical module (SEM and TEM);
- ii) sample preparation module;
- iii) operator module.

This last module represents a personalized instruction that involves specific training, with at least 12 hours of work.

For the TEM (only after the SEM course), the formation is divided into two phases:

- i) sample preparation (divided in biological and non-biological samples);
- ii) operator module, with a minimum of 10 hours of individual training for each module.

In the final, an examination will take place that confers the certificate.

3.2 Teaching, training, information and demonstration activities in the frame of the University curricular activities

3.2.1 Training activities:

Training of equipment users/operators	Full Duration Hours	Participants
SEM operator TEM operator	30h	Lisete Fernandes
SEM operator TEM operator	14h	Gopal Mishra (PhD grant)
SEM operator TEM operator	12h	Marco Lucas (PhD grant)
SEM operator	10h	Cristina Oliveira (Auxiliary Professor)

3.2.2 Curricular units with training and teaching in electron microscopy unit:

	Curricular unit	Course
PhD courses 3 th cycles	Materials	Quaternary, Materials and Cultures
	Materials	Forestry
Master's courses 2 th cycles	Instrumental Methods of Analysis	Laboratory Clinical Biology
	Histology and Pathology Techniques	Health Sciences Biotechnology
Degree courses 1 st cycles	Cell biology	Biology and Geology for Education
	Cellular and Molecular Biology	Biomedical Engineering
	Laboratory techniques	Biochemistry
	Developmental Biology	Bioengineering
	Cellular and Molecular Biology	Food Science
	Cellular and Molecular Biology	Biology
	Cell biology	Genetics and Biotechnology
	Cell biology	Applied Ecology
	Chemistry	Electronic Engineering

3.2.3 Study visits to UME:

Origin	Promoter	Number of Students
Esc. Sec.de Mondim de Basto	R.P.I.	182
Esc. Camilo Castelo Branco	UME	40
Esc. Peso da Régua	R.P.I.	55
Esc. Sec.de Penafiel	R.P.I.	50
Instituto Politécnico de Bragança	R.P.I.	15
Esc. Sec. Morgado Mateus	UME	60
Esc. Sec. de Sabrosa	UME	50
Esc. Sec. de Viana do Castelo	UME	40
Esc. EB 2,3 de Sta.Marta	R.P.I.	60
Ciência Viva Project	UME	8
Biology Conference Workshop	UME	10
	Total	570

R.P.I. – Relações públicas e Institucionais da UTAD (UTAD Public Relations)

UME – Unidade de Microscopia Electrónica da UTAD (UTAD - Electronic Microscopy Unit)

4. Electron Microscopy service activity and collaboration in research and development projects

4.1 Electron Microscopy service activity

User Class Application	Number of Users	Number of Work Sessions	Number of Hours (h)
Visitors	570	31	65
Classes	298	22	56
Training activities	4	82	62
Teachers / Researchers (PhD)	26	67	193
Researchers (PhD) (under Research Grant contract)	7	26	62
PhD Students	13	38	130
MSc Students	4	6	17
BSc / Licence Students	3	4	11
Public and private companies (Industry and Services)	3	39	115
Maintenance	2	10	32
TOTAL	930	325	743

5. Other activities.

Photography exposition "*Five years of Electronic Microscopy in UTAD*", started at 29th of June, 2010 with 64 photos of SEM and TEM.

A one day **TEM course** in July 2010 was given by Professor Paulo Ferreira, with 25 participants. During the course, an interactive contest was made to elect the best 5 pictures of the exposition "*Five years of Electronic Microscopy in UTAD*".

A Unidade de Microscopia Electrónica

A UNIDADE DE MICROSCOPIA ELECTRÓNICA (UMEC) é uma infraestrutura da Universidade de Trás-os-Montes e Alto Douro (UTAD) sob a coordenação do Dr. D. Diniz.

O funcionamento da UME visa apoiar a investigação e desenvolvimento e a formação mediante o serviço de investigação dos diversos Centros de Investigação e Departamento da UTAD, de outras Universidades e de instituições públicas e privadas. Pode igualmente prestar serviços, gerando um impacto económico e tecnológico de nível transnacional. Também é objetivo da UME a formação contínua de alguns dos seus alunos e a prestação de intervenções técnicas aos alunos de outros secundários, através da realização de ações de formação e de demonstração.

A UME tem vindo a desenvolver trabalhos com os diversos Centros de Investigação da UTAD e em parceria com outras instituições e entidades: o Polo FCTP e FEUP; o IIRN; o IIRN; a U.P. de Viseu e Bragança, entre outros. Os materiais analisados incluem materiais biológicos e não biológicos. Presta também serviços a empresas como a Cantaria António e M. Lapaúcos (resinatos).

A UME dispõe atualmente de um Microscópio Electrónico de Transmissão (TEM), um Microscópio Electrónico de Varredura com feixe Análise de Energia Dispersiva (SEM-EDS), adaptado para análise química elementar (EDS) e equipamento complementar para preparação de amostras ultramicroscópicas, equipamento de carbono e equipamento de apoio.

A UME dispõe ainda de um equipamento de Rastreamento (AFM) integrado pelo Centro de Química da UTAD.

Programa (13/Jul/2010)

14:30 - Sessão de Início (Inf. das Ciências Florestais)
 Lecionada pelo Professor Dr. Paulo Ferreira da Universidade do Tago em Avelal.

16:30 Laboratório da UME (Caso do EIL das Ciências Florestais)
 Preparação e observação de nanopartículas.

Paulo Jorge Ferreira nasceu no Porto, Portugal. Licenciou-se na Universidade do Porto, em Engenharia de Materiais. É doutorado em Ciências das Materiais pela Universidade de Illinois, E.U.A.

Atualmente é professor adjunto na Faculdade de Engenharia da Universidade do Tago em Avelal. Concluiu a sua investigação científica nos domínios de Nanotecnologia, Nanobiologia e Microscopia Electrónica. No mesmo domínio concluiu a sua graduação em Ciências das Materiais com forte ênfase na nanotecnologia sendo o Coordenador Adjunto do Programa de Pós-Graduação em Ciências de Materiais da Universidade do Tago em Avelal. É consultor do Centro de Química - UTA Rio de Janeiro e do Centro de Química da Madeira.

Admissão
 O curso destina-se a docentes, investigadores e alunos de 1.º, 2.º e 3.º ciclos. Inscrevem-se em número correspondente ao número de vagas, que o TEM oferece para investigação em materiais.

Em virtude do carácter prático do 2.º parte a organização reserva o direito de limitar as inscrições, de se organizar grupos de trabalho.

Formulário de Inscrição

Estudantes 1.º, 2.º e 3.º ciclos: 20 Euros;
 Público em geral: 30 Euros

MP para o teste: _____

Nome: _____

Matrícula: _____

Endereço: _____

Telefone: _____

Preferencialmente inscrição por e-mail, para ume@utad.pt

O pagamento poderá ser efetuado por cheque cruzado à ordem da Fundação Rui D. Diniz e enviado para:
 Universidade Trás-os-Montes e Alto Douro
 Fundação Rui D. Diniz, Quinta de Praxela, 22
 Pedralva, 5000-2, 5001-801 Vila Real, Portugal
 Ou directamente ao curso para o RIB:
 0007 0000 0020 1200 2152 3
 Guardar o comprovativo enviado para o e-mail.

**3.º CURSO DE MICROSCOPIA ELECTRÓNICA
 MICROSCOPIA ELECTRÓNICA DE
 TRANSMISSÃO**
 (Análise de materiais em TEM)
 13 de Julho de 2010 (14:30)

Universidade de Trás-os-Montes e Alto Douro
 Fundação Rui D. Diniz
 UNIDADE DE MICROSCOPIA ELECTRÓNICA
 Rua das Ciências - Resende, 200
 5001-801 Vila Real
 Tel: +351 259 350 501
 Fax: +351 259 350 480

6. Analysis of activity progress with reference to planning, and strategies for improvement.

The functioning of the UME laboratory is dependent on the services payment and on the FCT contribution. Maintenance contracts are very expensive (6500 Euros/year for SEM and 9000 Euros/year for TEM) and UME cannot afford it in a regular base. Most of the regular maintenance is made by UME technical staff.

Despite the good functioning of the laboratory, we would like to emphasize the time consuming of TEM photos by conventional process. Due to the fact that our equipment has a sheet-film camera, all the images from TEM have a slow process from the time of analysis until the emission of results to the user. In addition the sheet films are very expensive (270 Euros a box of 100 sheets) and we have increasing acquisition difficulties because Kodak is expected to stop production in 2/3 years. The budget needed for acquisition of a digital camera is 43 000€, but it will be a worthy investment to improvement of our services so, it is in our near objectives.
